Work With Us

Finger Lakes Institute (FLI) is dedicated to the promotion of environmental research and education about the Finger Lakes and surrounding environments. In collaboration with regional environmental partners and state and local government offices, the Institute fosters environmentally-sound development practices throughout the region, and disseminates accumulated knowledge to the public.

About FL-PRISM

The Finger Lakes Partnership for Regional Invasive Species Management (FL-PRISM) is a network of partners in 17 counties of the Finger Lakes region of New York and brings together the resources of a diverse range of organizations to prevent, detect, control, and manage invasive species; ultimately reducing their proliferation and impacts. With the cost to control invasive species within the United States estimated between \$120B and \$137B annually (Pimentel *et al.* 2005, Runyon *et al.* 2012), the FL-PRISM allows for sharing and leveraging of limited resources within the partnership while representing a highly-visible program that builds community awareness and participation.
