

## 2019 Fish Sale Stock your ponds

### Stocking Triploid Grass Carp to Control Aquatic Vegetation in New York Waters

Triploid Grass Carp: Grass Carp, which are sterile and incapable of producing viable young, are the only form of grass carp legal in NY due to concerns of the potential impact fertile grass carp could have on the ecosystem. Grass carp prefer submergent, tender plant species such as elodea, coontail, fanwort, curly leaf pondweed and watermilfoil. They will not control emergent plants such as cattail, bulrush or floating plant species such as water lily.

**Please include a copy of the approved DEC permit with order form.**

A DEC permit is required before you can buy and stock grass carp in your pond. A link to the DEC permit for [http://www.dec.ny.gov/docs/wildlife\\_pdf/grasscarpstockap.pdf](http://www.dec.ny.gov/docs/wildlife_pdf/grasscarpstockap.pdf), or you can call our office and we can mail a copy. The permit should be completed and sent to DEC at least three weeks before our sale to ensure you receive your permit before our deadline.

Species	Price	Quantity	Total
Fathead Minnows 2"-3"	\$20.00/ 1 lb (Appx. 150)

(Behind Sheriff's station)  
**May 2nd  
5-6 P.M.**

**Fish food now available:** Feeding the fish in your pond from April to October can dramatically increase their growth. Bass, perch, catfish and minnows are all fed fish food at the hatchery and will readily take it once stocked in your pond. Wild bass already present in your pond may have a difficult time adapting to fish food. Other species will usually figure it out, except for crappie and walleye, which prefer minnows and natural feed. We are offering 10 pound bags, but larger quantities are available through us.

**What containers & water should I use?** We recommend a large cooler or clean garbage can with lid filled with at least 15-20 gallons of water from your pond. Do not use chlorinated water to transport your fish. Bring at least 20 gallons of pond water for every 6 Grass Carp, 30 Catfish, 500 Minnows, 100 Bass or 100 Perch for a travel time of 30-45 minutes. Please bring a cover for the containers, so the water does not splash around and the fish do not jump or splash out. A garbage bag with a tie in the container works.
